MULTIPLY

The instant room with the x-factor

Easy to assemble and disassemble together with it's material robustness makes it quite unique – even if we say so ourselves.

1. Engineered steel frame
2. Adjustable steel pads eliminating the need for a traditional Foundation
3. Lightweight eco-friendly concrete wall panels with thermal insulation, energy and acoustic efficiencies
4. Insulated wrap-around roof eliminating the need for gutters & downpipes

Smart & functional design

The rigid U-shaped profile frame frees up three of the four façades to allow for various configurations with varying amounts of glazing without ever compromising structure.

Internal
floorspace

2.7m x 1.9m

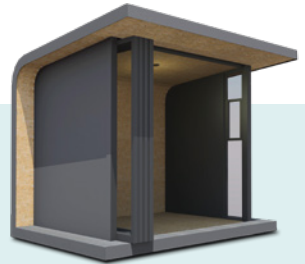

Studio*

Solid white panel

Visio*

Fixed glass panel

Ostendo*

Folding stacking doors

Add a solar starter kit to your xPod up to 4Kwh, that's enough to help power your home
